

Kevoy Community Development Institute (KCDI)

In recognition of the significant contribution which skills acquisition can make to the alleviation of poverty through enhancing employability and improvement in living standards; KCDI has formulated projects and programmes to achieve increased earnings, and support specific skills training activities.

These training activities are offered to Non-Government Organizations (NGOs), Community-Based Organizations (CBOs), Farming Groups, Community Development Committees (CDCs), Parish Development Committees (PDCs) & Regional Agricultural Chambers and Societies. Farming Groups are targeted as their impact on families, communities and the nation cannot be overstated.

With this in mind KCDI designed the Farm Management Training programme (FMTP). Our partners are Rural Agricultural Development Authority (RADA), Jamaica Agricultural Society (JAS), Social Development Commission (SDC) and Jamaica Foundation for Life Long Learning (JFLL). The Farm Management Training Programme aims to enable farmers and their communities to improve their living standards while increasing their economic bases.

A few of our regional programmes

:

- ◆ Farmers Trainer of Trainers
- ◆ Farm Management Training

OBJECTIVES

KCDI objectives are to ensure the reduction in vulnerability of the poor in a sustainable and gender-sensitive manner of people and their communities:

- By **promoting and strengthening the capacity** of community organizations to initiate and manage change.
- To **improving the human resource base** through skills development and social re-adjustment; and
- To **expansion and manage** the stock of social and economic infrastructure, using labour and technology effort to intensive measures and community mobilization to enable access to a wide range of basic services.

Other Training Seminars & Workshops

- Small Business Management
- Financial Management
- Capacity Building
- Project Team Building & Negotiation
- Parenting Development Workshop
- Farm Management Training

“Educating ,Training & Empowering Caribbean People”

Farm Management Training

The programme’s objectives are

To increase knowledge of farm management and improve human resource planning in agriculture.

To develop technical and managerial skills in those desiring to enter or continue a career in farming.

To encourage students to pursue further education in agriculture or veterinary medicine.
